

CONGRATULATIONS

ON TAKING STEPS TO PROTECT YOUR DOG
AGAINST FLEAS AND TICKS
FOR UP TO 12 MONTHS*

WHAT TO EXPECT FROM BRAVECTO® QUANTUM

CONTINUOUS PROTECTION

- With increasingly unpredictable weather patterns, tick risk—especially in winter—cannot be reliably forecast. As a result, year-round tick control is now increasingly recommended across the country.
- One injection protects against flea and tick infestations for up to one year.*

PROVEN TRACK RECORD

- BRAVECTO® QUANTUM is the newest innovation that utilizes a unique patented composition of fluralaner in an injection.
- Studies have shown BRAVECTO® QUANTUM to be an effective way to protect dogs for up to one year.*

PEACE OF MIND

- Nothing to remember means nothing to forget. No redosing, no reordering.
- Ideal for dogs that struggle with oral or topical products.

1 SIMPLE INJECTION.

UP TO 12 MONTHS OF UNINTERRUPTED PROTECTION.*

WHEN TO CONTACT YOUR VETERINARIAN

Contact your veterinarian if you notice any side effects that last longer than a few days or see anything unusual that's not listed in the package insert. The most commonly reported observable side effects included lethargy, decreased appetite, vomiting, diarrhea, pruritus, injection site lumps or swelling. Less common side effects that require medical attention are seizures or signs of allergic reactions (hives, facial edema, acute vomiting and heavy breathing).¹

NEXT DOSE DUE

This material is intended to be distributed to the pet owner following the injection of BRAVECTO® QUANTUM by a veterinary professional. *BRAVECTO® QUANTUM is indicated for the treatment and prevention of flea infestations (*Ctenocephalides felis*) and for the treatment and control of tick infestations with *I. scapularis*, *D. variabilis*, and *R. sanguineus* for 12 months, and *A. americanum* for 8 months in dogs and puppies 6 months of age and older.
