

# CIRCUMVENT® C-L

## One Purpose-Built, 2-in-1 Vaccine

The newest member of the CIRCUMVENT® vaccine family, CIRCUMVENT® C-L is the first and only vaccine that provides protection against both porcine circovirus type 2 (PCV2) and *Lawsonia intracellularis* with one bottle.

Cuts down on  
labor and waste

May increase  
feed savings<sup>1</sup>

May reduce late finishing mortality  
due to porcine circovirus-associated  
disease (PCVAD)<sup>1</sup>

<sup>1</sup>As demonstrated in a study using a Circumvent® porcine circovirus type 2 vaccine.

C

## The C in C-L: Porcine circovirus type 2

Porcine circovirus-associated disease (PCVAD) can increase mortality, culls and treatment costs, negatively impact average daily gain as well as increase the severity of coinfection from porcine reproductive and respiratory syndrome (PRRSV), *Mycoplasma hyopneumoniae* (M. hyo) and influenza A virus in swine (IAV-S).<sup>2</sup> A PCV2 vaccine matters in helping protect pigs and profitability.

L

## The L in C-L: *Lawsonia intracellularis*

*Lawsonia intracellularis* causes ileitis, an enteric disease that decreases average daily gain and feed efficiency. As a result, much more feed is required for pigs to reach market weight.

C-L

## Fewer injections. Same confidence.

Circumvent® C-L provides the same efficacy and convenience as Circumvent® C-M-L vaccine while removing the *Mycoplasma hyopneumoniae* fraction to fit the needs of *Mycoplasma*-negative herds.

Producers: consult your veterinarian to determine whether this product is suitable for your herd and for advice on your vaccination protocol.

Veterinarians: always consult the product label to ensure suitability for the intended animal.

As with all vaccines, the efficacy of a product may vary depending on the animal's current health state and its environment.
