🕒 Diabetes mellitus is a lifelong condition, however, with appropriate treatment, pets with diabetes can live a healthy and normal life. Successful management depends on regular and frequent exercise, diet and insulin. Diabetes stabilization can take up to three months, and all family members need to take ownership of their pet's diabetes.

# How to Save Images & Text from this PDF

- 1 Save this PDF to your computer (on your "Desktop" or other location of your choice).
- 2 Open the file. Click on the Attachment icon to view a list of images and animations.
- 3 Shift-click on all the file names and click "Save Attachment" icon. Choose the location where you want to save the files.
- 4 Next, highlight the text you wish to post. Right-click on the text and select "Copy".

STEP 2

STEP 3

# How to Add Images & Text to Social Channels

- 1 Log into your social media account.
- 2 Right-click in the text field and select "Paste". Adjust line breaks and spacing as required.
- 3 Click on the "Add photo/video" icon. Select the image (.jpg) or animation (.mp4) you previously saved. For videos, make sure to title your video and add the post text as your video description.
- 4 Both the image and the text should now be visible in the post preview area. Finish by posting or tweeting live.

# How to Post on Instagram

- 1 Click on the "+" sign at the bottom of your screen to start creating a new post.
- 2 Add the photo(s) or video you would like to post, and click "Next".
- 3 If you want to edit or add filters to your post, you can otherwise click "Next" to skip this step.
- 4 Where it says "Write caption" you can add the text for your post.
- 5 When finished creating your post, click "Share" to upload the content. You can also link your Instagram account to Facebook and/or Twitter to have any post from Instagram uploaded to that platform automatically.

# Social Media Best Practices

Let us help you with your social media. We have created images, animations and prewritten content so you can quickly and easily help bring awareness to your followers about pet diabetes.

While we have developed this content with great care, we wish to remind you that it is your ultimate responsibility to ensure that this content does not infringe any rule, including your Code of ethics.

## OVERVIEW

Pick the channel that best works for your business goals. All of them have something a bit different to offer.

**Facebook:** Ages 18-44. Connect with people.

**Instagram:** Age 35 and under. Photo sharing.

## FACEBOOK

With over 2 billion monthly users, Facebook is pivotal for small businesses. Target your audience, promote services and enhance recognition.

### Best Practices

- **Best time to post:** Thursday and Friday from 1 to 3 p.m.
- **Post with a purpose:** Post useful information and content they will remember like stories or statistics.
- **Interact with your followers:** Respond to questions/concerns as well as to positive/negative comments! Always be professional.

## INSTAGRAM

It's visual, simple, and used by a younger generation. Go beyond the adorable pet photos, share your clinic's mission and goals.

### Best Practices

- **Best time to post:** Daily from 3 to 4 p.m.
- **Post relevant and frequent content.**
- **Know your audience:** Watch for trends daily from 3 to 4 p.m.
