

Revalor[®]-200

(trenbolone acetate 200 mg/estradiol 20 mg)

TRUSTED
for over fifteen years!

Designed to increase the rate of weight gain and improve feed efficiency in steers and heifers on higher energy rations

EACH IMPLANT CONTAINS

200 mg trenbolone acetate

20 mg estradiol

Of all the immediate-release Revalor[®] products, **Revalor[®]-200** has the **longest maximum duration (140 days)**, giving feedlot cattle a long growth boost without rehandling.

- **Revalor[®]-200** is approved for use in both feedlot steers and heifers; marketed in Canada for over fifteen years.
- **A flexible suggested reimplantation window (50 days)** helps with labour coordination and planning.
- **Revalor[®]-200** is considered a high dose combination trenbolone acetate/estradiol implant; ideal for use in performance focused single implant programs for feedlot heifers and steers; or as a terminal implant in long-fed re-implant programs for feedlot heifers and steers.

	Suckling calves	
	Weaned/ growing beef cattle	
	Grass steers or heifers	
	Feedlot steers	✓
	Feedlot heifers	✓
	Suggested reimplantation window	70-120 days
	Maximum duration	140 days

Merck Animal Health

Trenbolone acetate 200 mg / estradiol 20 mg

Veterinary Use Only

FOR FEEDLOT STEERS AND HEIFERS (300-450 Kg)

DIN: 02254026

DESCRIPTION

Revalor[®]-200 is an implant containing 200 mg of trenbolone acetate and 20 mg estradiol. Each implant consists of 10 small yellow pellets.

Each pellet contains:

20 mg trenbolone acetate, 2 mg estradiol.

THERAPEUTIC CLASSIFICATION

Growth promotant.

INDICATIONS

To increase rate of weight gain and improve feed efficiency in feedlot steers and heifers weighing 300-450 kg. The administration of Revalor[®]-200 can result in decreased marbling compared to non-implanted steers and heifers. Studies in the U.S.A. have not demonstrated any advantage to the use of Revalor[®]-200 over the use of Revalor[®]-H for improved weight gain or feed efficiency in feedlot heifers.

DOSAGE AND ADMINISTRATION

Dosage form:

One implant containing 200 mg trenbolone acetate and 20 mg estradiol is administered to each animal. The 10 pellets which make up the dosage of Revalor[®]-200 are contained in one division of the multiple dose cartridge. Ten doses are in each cartridge. The cartridge is designed to be used with the Revalor[®] implant gun.

CAUTIONS

Do not use in animals intended for subsequent breeding.

WARNINGS

Do not use in calves to be processed for veal. Implant pellets in the ear only. Do not attempt salvage of implant site for human or animal food. Do not use in dairy cattle. Keep out of reach of children.

STORAGE

Store the unopened product below 25 °C. Do not freeze. Store the opened product under refrigeration (2-8 °C). Do not use the opened product after 6 months.

HOW SUPPLIED

Box of 10 cartridges x 10 implants (100 implants).
