

Designed to increase the rate of weight gain and improve feed efficiency in feedlot steers

Revalor®-S was the **first combination trenbolone acetate/estradiol growth promoting implant approved for use in feedlot steers;** marketed in Canada for over twenty five years.

- **Revalor**•-**S** is considered a moderate dose implant; ideal for use in long-fed feedlot steer re-implant programs.
- The **wide suggested reimplantation window** (50 days) helps with labour coordination and planning.

Product label: **Revalor**®-S

Merck Animal Health

Trenbolone acetate 120 mg/estradiol 24 mg Veterinary Use Only FOR FEEDLOT STEERS (250-450 kg) DIN: 02078589

DESCRIPTION

Revalor®-S is an implant containing 120 mg trenbolone acetate and 24 mg estradiol. Each implant consists of 6 small yellow pellets.

Each pellet contains:

20 mg trenbolone acetate, 4 mg estradiol.

THERAPEUTIC CLASSIFICATION

Growth promotant.

INDICATIONS

This product contains trenbolone acetate and estradiol in a slow release delivery system and is indicated to increase rate of weight gain and improve feed efficiency in feedlot steers weighing 250 - 450 kg.

DOSAGE AND ADMINISTRATION

Dosage form:

One implant containing 120 mg trenbolone acetate and 24 mg estradiol is administered to each animal. The 6 pellets which make up the dosage of Revalor®-S are contained in one division of the multiple dose cartridge.

Ten doses are in each cartridge. The cartridge is designed to be used with the Revalor $^{\circ}$ implant gun.

CAUTIONS

Not for use in animals intended for subsequent breeding. For use in feedlot steers only.

WARNINGS

Do not use in calves to be processed for veal. Implant pellets in the ear only. Do not attempt salvage of implant site for human or animal food. Keep out of reach of children.

STORAGE

Store the unopened product below 25 °C. Do not freeze. Store the opened product under refrigeration (2-8 °C). Do not use the opened product after 6 months.

HOW SUPPLIED

Box of 10 cartridges x 10 implants (100 implants).
