

VACCINATION AND YOUR HORSE: AN EXCLUSIVE ON-DEMAND WEBINAR FOR HORSE OWNERS

GAIN A **BETTER UNDERSTANDING OF DISEASES** THAT CAN SERIOUSLY COMPROMISE YOUR HORSE'S HEALTH, AND HOW YOU CAN HELP PREVENT THEM.

Brush up on your equine vaccination knowledge with **Dr. Serge Denis**, Merck Animal Health Technical Services Veterinary Consultant.

Take advantage of this opportunity to find out about:

- The diseases against which horses are most commonly vaccinated... and why.
- What you should know about these diseases, including:
 - Their clinical signs.
 - How they are transmitted.
 - Their prognosis.
 - What can be done to help prevent them.
- The difference between “core” and “risk-based” vaccines.

This on-demand webinar will help increase your awareness of equine diseases and of the importance of vaccination. What it won't do, however, is recommend vaccine protocols based on your horse's specific circumstances – which is something that's best left to your veterinarian!
